

Energy Action Plan

Want to improve the quality and performance of your community building? This simple guide is to support management committees that are wanting to 'Go Green'

- Form a team that can lead on your environmental action plan – make use of the skills and knowledge in your community.
- Draw up an Energy Policy for your building - [Environmental-Policy.docx](#)
- Carry out an energy audit to inform your actions – the Centre for Sustainable Energy offers guidance - [Energy survey for community buildings](#). Or the Sussex Community Foundation has produced a list of approved energy auditors - [List-of-accredited-auditors-for-website-2024.pdf](#)
- Consider the best measures you can take to improve your energy efficiency [Energy efficiency improvements for community buildings - Centre for Sustainable Energy](#)
- Retrofitting can reduce building closure time and be cost and carbon effective [Community-led retrofit - Centre for Sustainable Energy](#)
- Make an [Action Plan](#), to plan, monitor and review your progress
- Look for funding - see [Funding Energy Action - AirS Guide](#) for funding ideas
- For more in depth guidance information see this free download - [Village and Community Halls: A Net Zero Design Guide - ACRE](#)
